**e-Stamp** is a computer generated alternative for conventional stamp paper. Steps for generating e-stamp

1. Visit Registration Department portal [www.keralaregistration.gov.in](http://www.keralaregistration.gov.in) and select online applications.
2. Enter all required details and complete self verification.
3. System assesses stamp duty and registration fees to be paid.
4. Payment can be done in two modes viz. Direct to bank through net banking provided by E-Treasury application or through manual payment mode in which case, the pay-in slip is generated and the amount can be remitted at the selected treasury.
5. Payment may be confirmed in the Registration portal to generate e-Stamp.

E-Stamp has a unique serial number, GRN (Government Receipt Number) which is unique to Treasury, QR code which displays details of payee, amount, purpose etc, and other details like value of instrument, stamp duty paid and nature of instrument etc.

The authenticity of e-stamp can be verified at the Registration portal by giving the e-stamp serial number. Document details can be written/ printed on the e-stamp starting from the marked portion. Registered e-stamp on verification will show details of registration.

Registered e-stamp can be verified at <http://keralaregistration.gov.in>
